Guaranteed Analysis:

Feeding Directions

Show Stopper Steer Finisher HN202

Crude Protein	min	12%
Crude Fat	min	4%
Crude Fiber	max	14%
Calcium	min 0.4%	max 0.9%
Phosphorus	min	0.3%
Salt	min 0.1%	max 0.6%
Selenium	min	0.1%
Vitamin A	min	2,500IU/LB

Start calves that are later maturing at 5 lbs/hd/day and every three days increase by one lb/hd/day until the calves are up to 2% of their body weight on an as fed basis. When switching over from the developer, blend the feed 25/75 for three days and then 50/50 for three days and finally 75/25 for the last three days. Feed the amount they were feeding of the developer as they switch over. Also feed approx. 1% body weight of hay. When preparing cattle for a show, it is important to get the cattle finished approx. 30 days ahead of the show and then increase the **High Glo** or **Original Glo** up 4 to 8 lbs/hd/day to put on the ultimate muscle mass and touch. Always provide clean fresh water for better health and feeding results.
